

OWOADE JEREMIAH

STRENGTHS

- **Adaptability**
Flexibility in handling change and ability to adapt to new situations and challenges
- **Problem solving**
Breaking down problems into small bits and tackling them piece by piece
- **Time management**
Prioritizing tasks and meeting deadlines

SKILLS

Flutter · Dart · Firebase · Node.js · BloC ·
Provider · Riverpod · GetX ·
Database/SQLite · Version control · OOP ·
APIs · CI/CD · Test-driven development ·
UI/UX · Debugging

PASSIONS

- **Open source projects**
- **Volunteer work**
- **Continuous learning**
- **Health and fitness**

Flutter Developer

📞 07010894583 @ jeremiah.devv@gmail.com 📍 Lagos, Nigeria

SUMMARY

Experienced Flutter Developer with over 3 years of programming expertise, specializing in Flutter and Dart. Proficient in various aspects of Flutter development, including in-depth knowledge of state management solutions such as Provider, Riverpod, and BLoC. Additionally, well-versed in web development.

EXPERIENCE

- Flutter Mobile Developer**02/2024 - Present
Bitmask technologiesRemote
- Developed and maintained cross-platform mobile applications using Flutter framework.
 - Implemented custom UI components and animations to enhance user experience and usability.
 - Integrated RESTful APIs for authentication and to fetch and display real-time data, improving app functionality and performance.
 - Collaborated with designers and other developers to implement new features and resolve technical issues

PROJECTS

- Instagram clone**
Designed and implemented an Instagram clone featuring comprehensive functionalities, leveraging Provider for state management and Firebase as the backend solution. Incorporated additional elements for an enhanced user experience, such as real-time updates, user authentication, and dynamic content delivery.
https://github.com/JER3MIAH/flutter_instagram_clone
- Habit tracker**
Developed a Habit Tracker app entirely powered by local storage, showcasing efficient state management with Provider. Designed personalized habit tracking, progress visualization, and user-friendly interfaces for a seamless user experience. Implemented dynamic notifications and local data persistence to ensure a self-contained and responsive application.
https://github.com/JER3MIAH/habit_tracker_app
- Notes app**
Created a feature-rich notes app with additional functionalities, including an integrated Todo list, dark/light mode options, and local notifications. Implemented animations for enhanced user experience and employed the BLoC state management solution for efficient app architecture.
